D

Leistungsfähigkeitstests des Produkts, durchgeführt in Übereinstimmung mit der EU-Verordnung Nr. 65/2014 – Ref.: IEC 61591 Die höchste Leistungsfähigkeit wird erreicht, wenn eventuell vorhandene Verkleidungsplatten geöffnet sind.

Bei allen Hauben mit einer Leistungsfähigkeit von über 650 m³/h ist die letzte Stufe zeitgesteuert; sie läuft mit einer Dauer von 7 Minuten, danach schaltet sie automatisch wieder auf die letzte, nicht zeitgesteuerte Stufe zurück.

Reduzierung der Umweltbelastung:

Um den Verbrauch des Haushaltsgeräts so gering wie möglich zu halten, empfiehlt es sich, immer die geringste der für die Kochart geeigneten Absauggeschwindigkeiten zu benutzen, das Gerät nicht länger als 15 Minuten nach dem Ausschalten der Kochfelder in Betrieb zu lassen und die Beleuchtung immer auszuschalten, wenn man sich von dem Kochbereich entfernt.

EN

Product performance test carried out in accordance with standard (EU) No 65/2014-Ref: IEC 61591

Maximum performance is achieved by placing the mobile panels, if any, in the open position.

All hoods with capacities exceeding 650 m³/h have the last timed speed; It lasts for 7 minutes, after which it automatically returns to the last non-timed speed.

Reducing environmental impact:

To reduce energy consumption, we recommend you always use the lowest suction speed among those suitable for the cooking mode currently active, avoid leaving the appliance running for more than 15 minutes after burner shutdown and switch off the lights if you leave the cooking area.

F

Tests sur les performances du produit réalisés conformément au règlement (EU) N° 65/2014 - Réf. : CEI 61591

On obtient le maximum des performances en positionnant les panneaux mobiles, s'ils sont présents, en position ouverte.

La dernière vitesse est temporisée sur toutes les hottes ayant un débit supérieur à 650 m³/h ; elle a une durée de sept minutes après quoi on revient automatiquement à la dernière vitesse non temporisée.

Réduction de l'impact environnemental:

Pour contenir les consommations de l'électroménager, il est conseillé de toujours utiliser la vitesse d'aspiration la plus basse parmi celles les plus adaptées au type de cuisson en cours, de ne pas laisser le dispositif en fonction pour plus de 15 minutes après l'arrêt des feux et de toujours éteindre les lumières si le consommateur s'éloigne de la zone de cuisson.

NL

Tests van de prestatie van het product uitgevoerd in overeenkomst met de regelgeving (EU) Nr 65/2014 - Ref: IEC 61591

De maximale prestatie wordt behaald door de mobiele panelen, indien aanwezig, in de open positie te plaatsen.

Alle kappen met een vermogen van meer dan 650 m³/u hebben de laatste getimede snelheid; deze heeft een duur van 7 minuten, op het einde daarvan valt ze automatisch terug naar de laatste niet getimede snelheid.

Beperking van milieuverontreiniging:

Om het verbruik van het apparaat te beperken, is het raadzaam om steeds een lagere zuigsnelheid dan vereist in te schakelen, het apparaat na het doven van de branders niet langer dan 15 minuten te laten werken en steeds de lichten uit te schakelen als de kookzone wordt verlaten.

ES

Prueba de rendimiento del producto efectuada de acuerdo con lo dispuesto en el Reglamento (UE) 65/2014 - Ref.: IEC 61591

El máximo rendimiento se obtiene mediante la colocación de los paneles móviles, si los hubiera, en posición abierta.

Todas las campanas con capacidades superiores a 650 m³/h tienen la última velocidad programada. Dicha velocidad tiene una duración de 7 minutos, al final de la cual retorna automáticamente a la última velocidad no programada.

Reducción del impacto ambiental:

Para reducir el consumo del electrodoméstico, se recomienda utilizar siempre la velocidad de aspiración más baja entre las adecuadas al tipo de cocción en curso, no dejar el dispositivo en funcionamiento durante más de 15 minutos después de apagar el fuego y, apagar siempre las luces, si nos alejamos del área de cocción.

I

Test sulle performance del prodotto eseguiti in conformità al regolamento (EU) No 65/2014 - Ref: IEC 61591

Il massimo delle performance si ottiene posizionando i pannelli mobili, se presenti, in posizione aperta.

Tutte le cappe con portate superiori ai 650 m³/h hanno l'ultima velocità temporizzata; essa ha una durata di 7 minuti, al termine dei quali ritorna automaticamente all'ultima velocità non temporizzata.

Riduzione dell'impatto ambientale:

Per contenere i consumi dell'elettrodomestico si raccomanda di utilizzare sempre velocità di aspirazione più bassa tra quelle adeguate al tipo di cottura in corso, di non lasciare il dispositivo in funzione per più di 15 minuti dopo lo spegnimento dei fuochi, e di spegnere sempre le luci se ci si allontana dall'area di cottura.

SV

Produktens prestandaterster utförda enligt standard (EU) Nr 65/2014 - Ref: IEC 61591

Den maximala prestandan uppnås genom att placera de rörliga panelerna i öppet läge, om sådana finns.

I alla kåpor med flöden över 650 m³/h är den sista hastigheten tidsstyrd; dess varaktighet är 7 minuter, efter vilka den återgår automatiskt till den senaste icke tidsstyrda hastigheten.

Minskad Miljöpåverkan:

För att reducera hushållsapparaten strömförbrukning, rekommenderar vi att alltid tillämpa den lägsta fläkthastigheten, bland dem som är lämpliga för typen av pågående tillagning, att inte låta apparaten vara i funktion i mer än 15 minuter efter att ha stängt av gaslågorna och att alltid släcka ljuset när du avsläpnar dig från tillagningsområdet.

HU

A termék teljesítmény tesztjei a 65/2014/EU - Ref: IEC 61591 rendelet szerint lettek végrehajtva.

A legnagyobb teljesítmény akkor érhető el, ha a mozgó paneleket, amennyiben vannak ilyenek, nyitott állapotba helyezzük.

Minden páraelszívó berendezésnél, melynek 650 m³/h-nál nagyobb a teljesítménye, az utolsó sebesség temporizált; ennek az időtartama 7 perc, miután ez az idő lejár, a sebesség automatikusan visszatér az utolsó nem temporizált sebességre.

Bei intensivem Garvorgang oder bei hoher Dampfkonzentration wird empfohlen, die Paneele zu öffnen, um die höchste Ansaugkraft zu erhalten.

With intensive cooking or large amounts of steam, it is advisable to open the panels for the maximum extraction.

En cas de cuisson intensive ou d'une concentration élevée des vapeurs, nous vous conseillons d'ouvrir les panneaux pour obtenir une aspiration maximale.

In het geval van intensieve kookactiviteiten of bij de ontwikkeling van veel stoom is het raadzaam de schuiven te openen voor maximale afzuiging.

En caso de cocción intensiva o de una elevada concentración de vapores, se aconseja abrir los paneles para tener el máximo de aspiración.

In caso di cottura intensiva o di un' elevata concentrazione di vapori ,si consiglia di aprire i pannelli per avere il massimo dell'aspirazione.

I tilfælde af intensiv madlavning eller en forhøjet koncentration af dampe, er det tilrådeligt at åbne panelerne for maksimal sugning.

I händelse av intensiv matlagning eller hög koncentration av ångor, rekommenderas det att öppna luckorna för att erhålla maximal luftuppsugning.

Ved intensiv tilberedning eller ved høy dampkonsentrasjon anbefaler vi å åpne panelene for å oppnå maksimal sugeeffekt.

Intensiivisessä keitto-ja "korkea pitoisuus höyryjä, on suositeltavaa avata paneelit maksimaalisen imua.

GB INSTRUCTION ON MOUNTING AND USE

Check also the drawings on the initial pages with the alphabetical and numerical references in the explanatory text. Closely follow the instructions in this manual. We cannot accept liability for any faults, detriment or fire damage to the appliance due to non-compliance with the manual's instructions. Installation and electrical connections must be executed by a qualified technician. You should affix the hood to a wall of sufficient weight-bearing capacity, so not to one made of plasterboard.

Electrical connection

Make sure that there is a power socket near the hood and that the system has a 30 mA differential. The mains voltage must be the same as that on the label inside the hood. The hood has a 1250 mm power cable with or without plug: if it does have a plug, connect the hood to an accessible approved socket; or if it does not (connection direct to the mains), fit an approved bipolar switch with a minimum contact opening of no less than 3 mm (accessible). This installation and electrical connection must be executed by a qualified technician.

Operation

A C B D E F

With the hood switched off, pressing any key will activate the control panel in stand-by mode. The symbols are backlit by a white light, allowing you view and select the desired function.

Pressing one of the keys again will start the corresponding function, and its symbol will light up. After all functions have been switched off, the control panel will remain in stand-by mode for around 30 seconds and then switch off automatically.

A: Light ON/OFF key: press this touch sensor to switch on or off the lights of the hood.

C: Motor ON/OFF key (4 speed): press this touch sensor to switch on the hood extractor fan at the same speed as it was when last switched off. Use the „D“ and „B“ keys to vary the speed (power) of extraction.

B: Decrease extraction speed (power) key: press this touch sensor to reduce the extraction speed of the hood.

D: Increase extraction speed (power) key: press this touch sensor to increase the extraction speed of the hood.

E: Timer key: when this touch sensor is pressed, independently of the extraction speed selected, the timer function will be activated. Press once to set the timer for 5 minutes, press a second time for 10 minutes and a third time for 20 minutes. During this phase, the „E“ symbol will flash. To reset the timer, press the motor key, „C“

F: Reset filters key: press this touch sensor to reset the signal that warns that the metal grease filter (1) is saturated and the charcoal filter (2) should be replaced.

- (1) After 40 hours of using the hood, the „F“ symbol will flash to indicate the necessity of cleaning the metal grease filters.
- (2) After 120 hours of using the hood, the „F“ symbol will light up to indicate the necessity of replacing the activated charcoal filters.

Sensor function: pressing the „B“ and „D“ keys at the same time will activate the sensor. In this mode the extraction speed sets itself automatically and the „B e D“ key flashes intermittently. To return to manual operation, press either the „B“ or the „D“ key.

- 1: + motor
- 2: On/Off motor
- 3: - motor
- 4: On/Off light
- 5: Led

„If the remote control unit is changed, the appliance must be reset to the frequency of the new unit as follows:

1. Disconnect the power supply to the hood.
2. Wait 5 seconds and then switch the power supply on again.
3. Within the first 5 seconds, press the button for the lights and release it when the lights come on.
4. Within 5 seconds, press and release the motor button.

You will then need to wait for about 10 seconds, after which the hood can be used as normal. Whenever the power supply is disconnected, you must wait for 10 seconds before using the extractor.“

GB INSTRUCTION ON MOUNTING AND USE

Maintenance

Prior to any maintenance operation ensure that the cooker hood is disconnected from the electrical outlet.

Cleaning

The hood must be cleaned frequently both inside (apart from the area behind the grease filter) and outside. Use a cloth moistened with denatured alcohol or neutral liquid detergents. Never use products containing abrasives.

Warning: Failure to carry out the basic standards of the cleaning of the cooker hood and replacement of the filters may cause fire risks. Therefore we recommend observing these instructions.

Anti-grease Filter:

must be cleaned once a month, with non abrasive detergents, by hand or in dishwasher on low temperature and short cycle.

When washed in a dishwasher, the grease filter may discolour slightly, but this does not affect its filtering capacity.

Charcoal Filter - (only for filter version)

The active charcoal filters **F** are not washable nor regenerative. It should be changed every 6 months in normal use.

The active charcoal filters capture unpleasant cooking odours.

Replacing lightbulbs

Warning! Prior to touching the light bulbs ensure they are cooled down.

Led Light

If the lighting group LED does not work, please contact the technical service center in order to replace the whole group

Caution

Never use the hood without the grill properly fitted!

WARNING:

The accessible components can overheat when the cooktop is in use.

The hood must not be connected to the flues of other appliances that run on gas or other fuels. When the hood is used at the same time as other appliances that run on gas or other fuels, provision must be made for an adequate supply of air. No food must be cooked flambé underneath the hood. The use of an unprotected flame could cause damage to the filters and could cause fires, so should be avoided. When frying food, never leave the pan unattended because the cooking oil could flare up. Please comply with the technical and safety provisions set forth by your local competent authorities regarding the ventilation of hoods.

This appliance conforms to European Directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE). Please dispose of this product correctly in the interest of health and the environment.

The symbol  on the product, or on the documents accompanying the product, indicates that this appliance may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. Disposal must be carried out in accordance with local environmental regulations for waste disposal.

For more detailed information about treatment, recovery and recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

The device must not be used by a child or adult who suffers from a physical, mental or sensory handicap or has not the relevant experience and knowledge, unless they are aided or instructed on its use by a person responsible for their safety

If the power cable is damaged you should, in the interest of safety, contact the manufacturer or the manufacturer's technical assistance service to request a replacement, or ask someone who is similarly qualified.
